## DETAILED ACTION

### *Information Disclosure Statement*

1. The information disclosure statement filed 7/24/03 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the Japanese reference, JP64055764, for which no copy was received, has not been considered.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. The rejections of claims 15-16 under 35 U.S.C. 112, second paragraph, are withdrawn.

Upon reconsideration of the claims and Applicant's arguments, the Examiner has found the claims to be definite.

4. Claims 9-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 9-10 are rendered indefinite by the addition of the limitation directed to a perpendicular orientation promoting underlayer. It is not clear how this layer is structurally related to the other claimed layers since its relative location has not been set forth (see claim 2

for instance where the location of the perpendicular orientation promoting underlayer is defined with respect to the substrate and the perpendicular magnetic enhancement layer.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Futamoto et al. (US 6541125).

Futamoto et al. disclose a magnetic recording medium having a first underlayer formed from a CrTi alloy, a second underlayer formed from a CoCrPt alloy, a magnetic recording layer containing at least Co, Cr, and Pt, and a protective/lubricant overcoat. The reference also teaches that a soft magnetic layer can be used in between the substrate and the first underlayer.

***Response to Arguments***

7. Applicant's arguments filed 7/24/03 have been fully considered but they are not persuasive.

With respect to the rejection of claims 1-16 as being anticipated by Futamoto et al., Applicant argues that Futamoto et al. fails to teach the claimed "perpendicular magnetic

Art Unit: 1773

enhancement layer” and instead teaches an hcp underlayer. Applicant argues that the perpendicular magnetic enhancement layer of the present invention is formed of a metal “with excellent perpendicular properties.” Examples of suitable metals include Pt, Au, Pd or alloys thereof having fcc structures.

It is noted that the claims do not limit the crystalline structure of the perpendicular magnetic enhancement layer in any manner. Thus, Applicant’s claim reads on the Pt-containing hcp alloy underlayer taught by Futamoto et al.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
